ELECTRIC

https://www.aoyamaelevator.com/

Aoyama Elevator Global Ltd was founded in Japan in 1966,as a famous tower parking system Suppliers and Platform Lifts Company in Japan. About 25,000 employees in nearly 60 countries and regions around the world focus on providing high-quality Scissor Lifts for sale, intelligent industrial processes and services for sustainable development worldwide.Employees' work skills and professionalism are the cornerstone of the group's success.The group's sales for the 2016/2017 fiscal year reached 150 billion yen. AOYAMA Electric works develop comprehensive solutions in areas such as housing, office buildings and public transport to meet future challenges.

AOYAMA Tower Parking System is a high efficiency solution ideal for high density parking on a small footprint. Utilizing vertical reciprocating conveyors (VRC) to lift vehicles to different parking levels and conveyors at each parking floor to transfer vehicles to parking spaces. The average retrieval time is only 60s per vehicle.

The power source of this product can choose vehicle power and battery truck power supply. Lift car is featured fast movement speed, large operation range, lifting without external power, strong maneuverability. They have been widely used in municipal construction and maintenance, street lighting, highway facilities maintenance, engineering repair, landscape design and trim and other aerial-work industries.
